

ASMITA SAGARKAR

Full Stack Developer ◇ React ◇ Java ◇ Springboot

+91-6232883007 ◇ asmitasagarkar@gmail.com ◇ LinkedIn ◇ Portfolio ◇ Indore, India

SKILLS

Languages

Java, TypeScript, JavaScript, HTML, CSS, SQL

Libraries & Frameworks

Spring Boot, React.js, Next.js, Node.js, Redux Toolkit, Tailwind CSS

Databases & Tools

AWS, Kafka, MySQL, PostgreSQL, Prisma ORM, Hibernate, Git, Linux, Postman, Jenkins

EXPERIENCE

Software Engineer

Nov 2024 - Present

Tata Consultancy Services

Indore, India

- Enhanced system reliability and scalability for enterprise banking applications by developing and maintaining robust backend services, including building critical APIs for banking mandates, using Java.
- Supported critical application workflows and accelerated overall processing times by implementing complex business logic utilizing Spring Boot, JSP, and Servlets.
- Reduced cross-service data latency by architecting and building Kafka-based event-driven solutions for highly efficient asynchronous communication.
- Secured enterprise authentication and managed secure traffic routing by configuring an API Gateway via WSO2 API Manager and Identity Server.
- Streamlined the API lifecycle—including publishing, versioning, and environment-specific configurations—improving overall team deployment speed.
- Awarded **Star of the Month** (Feb 2026) for outstanding performance and consistent contributions to critical systems.

PROJECTS

Spndo – Full-Stack Finance Management Application (Live)

- Optimized data handling and user session security by developing a full-stack application using Next.js, Fastify, and Prisma ORM with JWT-based authentication.
- Improved user experience and retention by building a highly responsive interface featuring reusable components and real-time state updates.
- Reduced server response times by designing and implementing efficient backend APIs with robust data validation and error management.
- Ensured secure, uninterrupted session management by implementing token-based authentication featuring access and refresh token flows.
- Maintained high application uptime by deploying across Vercel (frontend) and DigitalOcean (backend), configuring NGINX and PM2, and resolving production CORS issues.

Movie Pulse (GitHub)

- Delivered a modern, responsive UI design for a movie web application by utilizing React and Tailwind CSS.
- Enriched the user experience by integrating real-time external data APIs alongside secure user authentication protocols.
- Decreased render times and ensured smooth user interactions by optimizing UI performance and implementing robust state management.

EDUCATION

B.Tech in Computer Science and Engineering, Medi-Caps University

2020 - 2024

CGPA: 9.25
